

We invite you to turn off your cell phone and head on a journey through the unspoiled nature of Gorenja Kanomlja. Stop the time and enjoy colourful wildflower meadows where silence is interrupted only by birds chirping, bees buzzing and stream burbling. Vast woodlands provide shelter to a variety of wild animals, such as deers, stags, chamois, as well as lynxes and bears.

Listen to the sound of nature.

This journey is nine kilometres long and will take between two and three hours, depending on your pace.

Along the way, visit the mineral and fossil collection by Janez Klemenčič, the Kanomlja klavže, the 40m high Ovčjak waterfall, the Šturmajce homestead, smithy Pr' Ivaniš, fruit drying stillhouse at the Zaklavže farm and the apiary with honey bee garden and trees.

Enjoy the trip!

**Šturmajce homestead**

Just a stone's throw from the Kanomlja klavže stands the grand Šturmajce homestead that accommodated over 70 people during its best years.

The homestead has been preserved in its original form. Today, it hosts different activities and art exhibitions and offers a glimpse into the past with demonstrations of traditional bread baking.

4

This small smithy is a unique feature of the isolated farm Pr' Ivaniš. Years ago, the farmer's skills of manual forging fulfilled the needs of his farm and those nearby for forged products and related services.

6

A visit to the bees, discovery of artistic beehive front panels and healing apitherapy help us to reconnect with nature.

1

A rich collection of minerals, ores, fossils and rocks by the amateur collector and former miner in the Idrija mercury mine, Janez Klemenčič, is carefully put on display.
